Reading Summary: Lecture 14
Due Tuesday, March 29, 9:35am

Lecture 14: Causal Reasoning

Please answer the following questions in at most one page.

Papers:

1. Causal reasoning differs from the variety of reasoning done in the rule-based systems we have seen, such as Mycin. Describe and explain what you consider to be the two or three most important differences.
2. What is the problem solving paradigm used in Gordius and how does it differ from the traditional version of that paradigm?
