D-lab Peru 2010

Trip Leaders: Patricia Pina and Lisa Tacoronte

Team Members: Dorothy Brown, Cory Smith, and five anonymous MIT students

1

Two Regions: Amazonas and Amparaes

Amazonas:

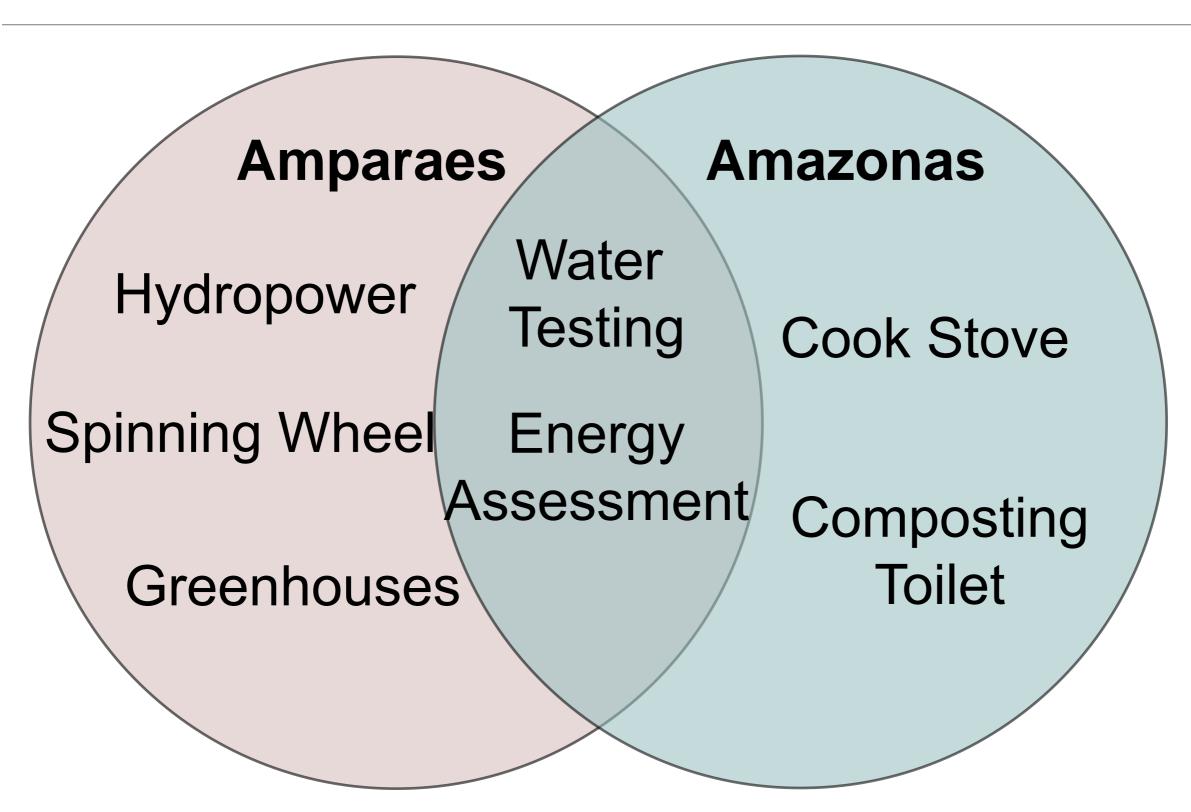

Nuevo Israel Comandancia Santo

Amparaes

Overview of Projects

Energy Assessment

Possible Energy Sources

Rivers/Streams

Wind

Hydrolantern

Micro-hydro/ Pico-hydro

Wind turbines

Possible Uses

Lighting
Schoolwork
Weaving
Herding Livestock

Radio

Water Testing and Treatment

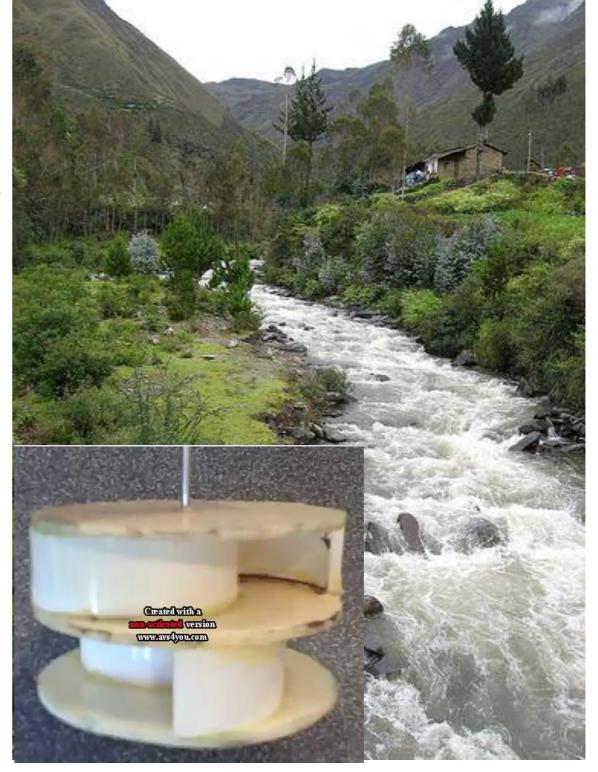

- Fecal, microbial contamination of water
- Test water to determine extent
- Water tests to show treatment efficacy
- Work with community to find most amenable treatment method

Project Hydropower (Amparaes)

- Energy Assessment
 - What scale is appropriate?
 - Flow Rates, Head, Velocity of Streams
 - User preferences
- Prototype
 - Hydropowered lantern
 - Portable, individual units
 - Trying different design

Images © source unknown. All rights reserved. This content is excluded from our ⁶ Creative Commons license. For more information, see http://ocw.mit.edu/fairuse.

Greenhouses (Amparaes)

- Add crops with high nutritional value
- Built using locally available, affordable materials and skills
- Current concerns
 - Communal vs. Family-owned
 - Locally available fertilizer?
 - De-assemb
 - Government-provided plastic, or alternative source?
- Building over Thanksgiving break, come join if you like!

Spinning Wheel (Amparaes)

- Community Needs:
 - Faster Method
 - Same Wool Thread Results (Tight thread)
- Project Goals:
 - Purchase Spinning Wheel
 - Get Feedback on Design
 - Replicate Spinning Wheel

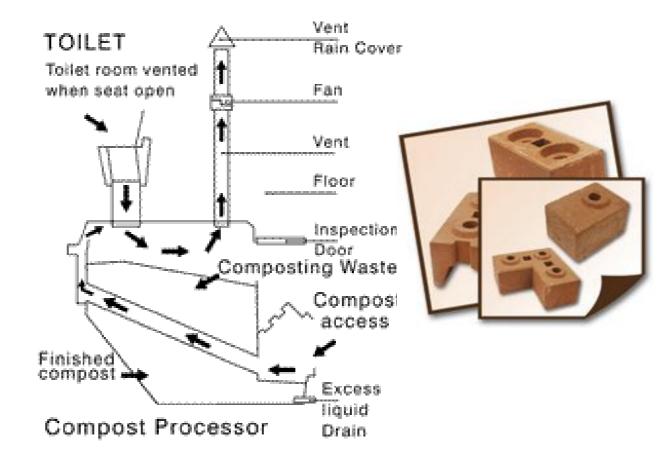

Composting Toilet (Amazonas)

Goals:

- Manage human waste
- Create Fertilizer
- Prevent Spread of Disease
- Issues to be addressed:
 - Safety of composted material
 - Inexpensive, nonintrusive design
 - Marketability and usefulness

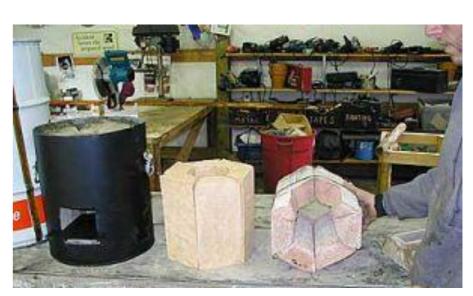

Efficient Cookstoves (Amazonas)

- Current Situation: Use wooden platforms with clay lining (open flame)
- Design Considerations:
 - Humid climate in the Amazon
 - •Families move every 5-6 years
 - Large amounts of clay available
- Possible Solutions
 - Portable clay stove design
 - Insulative Combustion Chamber
 - Alternatives: Concrete mixture or bricks
