## Exercises on graphs, networks, and incidence matrices

Problem 12.1: (8.2 \#1. Introduction to Linear Algebra: Strang) Write down the four by four incidence matrix $A$ for the square graph, shown below. (Hint: the first row has -1 in column 1 and +1 in column 2.) What vectors $\left(x_{1}, x_{2}, x_{3}, x_{4}\right)$ are in the nullspace of $A$ ? How do you know that $(1,0,0,0)$ is not in the row space of $A$ ?

Problem 12.2: (8.2 \#7.) Continuing with the network from problem one, suppose the conductance matrix is

$$
C=\left[\begin{array}{llll}
1 & 0 & 0 & 0 \\
0 & 2 & 0 & 0 \\
0 & 0 & 2 & 0 \\
0 & 0 & 0 & 1
\end{array}\right]
$$

Multiply matrices to find $A^{T} C A$. For $\mathbf{f}=(1,0,-1,0)$, find a solution to $A^{T} C A \mathbf{x}=\mathbf{f}$. Write the potentials $\mathbf{x}$ and currents $\mathbf{y}=-C A \mathbf{x}$ on the square graph (see above) for this current source $\mathbf{f}$ going into node 1 and out from node 3.
