## Exercises on eigenvalues and eigenvectors

Problem 21.1: (6.1 \#19. Introduction to Linear Algebra: Strang) A three by three matrix $B$ is known to have eigenvalues 0,1 and 2 . This information is enough to find three of these (give the answers where possible):
a) The rank of $B$
b) The determinant of $B^{T} B$
c) The eigenvalues of $B^{T} B$
d) The eigenvalues of $\left(B^{2}+I\right)^{-1}$

Problem 21.2: (6.1 \#29.) Find the eigenvalues of $A, B$, and $C$ when

$$
A=\left[\begin{array}{lll}
1 & 2 & 3 \\
0 & 4 & 5 \\
0 & 0 & 6
\end{array}\right], B=\left[\begin{array}{lll}
0 & 0 & 1 \\
0 & 2 & 0 \\
3 & 0 & 0
\end{array}\right] \text { and } C=\left[\begin{array}{lll}
2 & 2 & 2 \\
2 & 2 & 2 \\
2 & 2 & 2
\end{array}\right]
$$
